3. SERVICE CLASSIFICATIONS AND RATES (TWO-POINT) (Cont'd)

3.1 Interstate IntraLATA Service - Schedule I (Cont'd)(A) Application

Service between two points in the LATA is furnished as set forth in 3.1(B) and 3.1(C) following.

Service between three or more points (Conference Service) is furnished as set forth in 4.1 following.

(B) Mileage Measurement(1) Mileage Determination

Airline mileages between rate centers are determined as provided following.

In general, each point in the LATA is designated as a rate center except that certain small towns or communities are assigned adjacent rate centers with which they are closely associated for communication purposes or by community of interest and in a few of the largest cities there are several rate centers further identified as city zones.

(a) Where a Point is Divided into City Zones

- the rate airline mileage is measured between the rate center of the city zone and the rate center of the other point, except that when such mileage exceeds 40 miles, the rate airline mileage is measured between the rate center of the master zone and the rate center of the other point with a minimum of 41 miles being applicable.

(b) Where Both Points are Divided into City Zones

- the rate airline mileage is measured between the rate centers of the city zones, except that when such mileage exceeds 40 miles, the rate mileage distance is measured between the rate centers of the master zone with a minimum of 41 miles being applicable.

3. SERVICE CLASSIFICATIONS AND RATES (TWO-POINT) (Cont'd)

3.1 Interstate IntraLATA Service - Schedule I (Cont'd)

(B) Mileage Measurement (Cont'd)

(1) Mileage Determination (Cont'd)

- (c) The rate centers in this tariff are arranged alphabetically by rate center within the LATAs.
- (d) The columns headed "V" and "H" contain the vertical and horizontal coordinates for each rate center.
- (e) For the purpose of determining airline mileages, vertical and horizontal grid lines have been established across the states. The spacing between adjacent vertical grid lines and between horizontal grid lines represents a distance of one coordinate unit. This unit is the square root of 0.1, expressed in statute miles. A vertical (V) and a horizontal (H) coordinate is computed for each rate center from its latitude and longitude location by use of appropriate map-projection equations. A pair of V-H coordinates locates a rate center, for determining airline mileages, at a particular intersection of an established vertical grid line with an established horizontal grid line. The distance between any two rate centers is the airline mileage computed between their respective coordinate intersections as explained following.
- (f) To determine the rate distance between any two rate centers proceed as follows:
 - (i) Obtain the "V" and "H" coordinates for each rate center.
 - (ii) Obtain the difference between the "V" coordinates of the two rate centers. Obtain the difference between the "H" coordinates.

Note: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.

3.1 Interstate IntraLATA Service - Schedule I (Cont'd)

(B) Mileage Measurement (Cont'd)

(1) Mileage Determination (Cont'd)

(f) (Cont'd)

(iii) Divide each of the differences obtained in (ii) by three, rounding each quotient to the nearer integer.

(iv) Square these two integers and add the two squares.

If the sum of the squares is greater than 1777, divide the integers obtained in (iii) by three and repeat step (iv). Repeat this process until the sum of the squares obtained in (iv) is less than 1778.

(v) The number of successive divisions by three in steps (iii) and (iv) determines the value of "N". Multiply the final sum of the two squares obtained in step (iv) by the multiplier specified in the following table for this value of "N" preceding:

<u>N</u>	<u>Multiplier</u>	<u>Minimum Rate Mileage</u>
1	0.9	-
2	8.1	41
3	72.9	121

(vi) Obtain square root of product in (v) and, with any resulting fraction, round up to next higher integer. This is the message rate mileage except that when the mileage so obtained is less than the minimum rate mileage shown in (v) preceding, the minimum rate mileage corresponding to the "N" value is applicable.

(B) Mileage Measurement (Cont'd)

(1) Mileage Determination (Cont'd)

(f) (Cont'd)

(vi) (Cont'd)

Example:

The message rate distance is required between
Wilmington, Delaware, and Philadelphia, Zone 1
Pennsylvania

	<u>V</u>	<u>H</u>
Wilmington	5326	1485
Philadelphia	5251	1458
difference	<u>75</u>	<u>27</u>

dividing each difference by three and rounding
to nearer integer = 25 and 9

squaring integers and adding,	25 x 25 = 625
	9 x 9 = <u>81</u>
sum of squared integers	<u>706</u>

Multiply final sum of squared integers	706
by factor 0.9 (corresponding to "N" = 1)	x 0.9
	<u>= 635.4</u>

Square root of 635.4 = 25 and a fraction,
which is rounded up to 26 miles (fractions
being considered whole miles). The message
rate mileage is 26 miles.

The respective charge for each such portion (i), (ii), shall be either the rate specified in this tariff or the rate specified in the local general services tariffs or the intrastate message telecommunications service tariff of the Telephone Company, which is applicable for the type of call involved in each portion of the forwarded call.

On a Person-to-Person, Operator Station or Customer Dialed Calling Card Station call other than collect, the originating subscriber is charged the respective Person-to-Person, Operator Station or Customer Dialed Calling Card Station rate for the portion covered in (i) preceding. The charge for the portion of the call described in (ii) preceding is the Dial Station rate and charged to the call forwarding Customer.

On a collect call placed to a call forwarding directory number, the collect charges apply to the portion of the call between the rate center of the originating number and the rate center of the call forwarding location, but the portion between the rate center of the call forwarding location and the terminating rate center of the Customer will be billed at the Dial Station rate.

3.1 Interstate IntraLATA Service (Cont'd)(F) Optional Calling Plans (Cont'd) (N)(2) Verizon Prepaid Calling Card Service (T)General

Verizon Prepaid Calling Card Service provides additional payment options to customers who need to make calls within and outside of Telephone Company LATAs. The prepaid Card will be used for toll calls and can be used at any phone with touch tone capabilities. Customers will be able to purchase the prepaid Card from various retail outlets throughout the Telephone Company region. All InterLATA toll calls will be carried by the selected Interexchange Carrier ("IXC"). The Telephone Company will negotiate in a nondiscriminatory manner with all IXCs who wish to provide service for calls made using the Verizon Prepaid Calling Card Service. The prepaid Card will be available in \$5, \$10, and \$20 denominations.

Service Description

In order to activate the prepaid Card, customers should refer to the set of instructions contained on each card purchased. The customer will be instructed to dial a designated 800 number, the specified card authorization code found on the card, and the desired telephone number. Voice prompts will instruct the customer if any of the numbers entered are invalid. Once the system confirms that all of the numbers are valid, the call will be processed. At the start of the call, the customer will be advised of the time available on the card. The time available on the card will decrease automatically during the call at the established rate per minute. The customer will be given a "one minute warning" indicator that the card is only valid for approximately one additional minute. Customers can combine minutes from partially used cards to ensure that the entire value of the card is consumed. The call will be terminated when the value of the card is exhausted. At that time, customers may choose to end the call or elect to combine the value of partially used cards to continue the call. Voice prompts will instruct the customer as to the proper method of combining cards.

The rate for the Verizon Prepaid Calling Card Service will apply to all applicable minutes regardless of the time of the call.

Intelligent Toll Free Service is an intraLATA service that provides the customer with a Toll Free telephone number and the ability to receive incoming calls over a facility associated with a ten-digit local exchange access number, which is located within the same LATA as the customer in the States of Delaware and Pennsylvania. When a call is made to the toll free number, the originating end office switch sends a network query to a special database that links the toll free number to its local exchange access line number.

Each Intelligent Toll Free Service telephone number will be arranged to receive interstate intraLATA calls, which will be provided by this Company.

The three types of Intelligent Toll Free Services are:

- (a) Intelligent Toll Free Standard Service where service is provided via a usage bulk billing arrangement.
- (b) Intelligent Toll Free Basic Service where service is provided via a usage per message billing arrangement.
- (c) Intelligent Toll Free Key Connections Service where service is provided via a discounted usage per message billing arrangement. Customers subscribing to Intelligent Toll Free Key Connections Service must also subscribe to the Key Connections Volume Discount Calling Plan as specified in section 3.1(I)(2) preceding.

Each Intelligent Toll Free Service telephone number must be associated with a unique terminating seven-digit telephone number obtained by the customer. Interstate intraLATA calls terminating to a Intelligent Toll Free Service telephone number are subject to the terms and conditions of this tariff.

If Intelligent Toll Free Basic Service is disconnected within six months from the date of connection, a termination charge as specified in section 3.1(I)(2) following will be assessed. Rate Regulations(1) Minimum Average Time Requirement

(a) Intelligent Toll Free Standard Service

Minimum usage charges are based on an average of 30 seconds per completed call for each billing period. This means that if the average duration per call during any billing cycle is less than 30 seconds, billing will be based on an average of 30 seconds per call.

(b) Intelligent Toll Free Basic Service

Minimum usage charges apply to individual messages during a billing period. If the charge per message does not result in whole cents, charges will be rounded to the nearest penny when the bill is rendered.

1. Initial Period

The initial period for telephone connections is 30 seconds or fraction thereof.

2. Additional Period

The additional period for telephone connections is 6 seconds or fraction thereof.

(2) Method of Determining Usage Charges for Intelligent Toll Free Standard Service Calls

(a) Determine the total number of calls for each Intelligent Toll Free Standard telephone number separately.

(b) Determine minimum chargeable hours by multiplying the number of calls by the minimum average time requirement of 30 seconds (1 call = 30 seconds).

(c) Determine the total actual hours used.

(d) Determine the number of chargeable hours, which is the greater of (2) or (3) above, rounded to the nearest hundredth (two decimal places).

(e) Determine usage charges by multiplying the hourly rate in the appropriate taper(s) by the number of chargeable hours used in each taper and totaling these charges.

(3) Method of Determining Usage Charges for Intelligent Toll Free Basic Service Calls and Intelligent Toll Free Key Connections Service Calls

The rate for the initial period is applied for each message. Plus for the duration of the message, the rate for an additional period is applied for each increment of 6 seconds beyond the initial 30-second period.

(i) Volume Discounts

1. A volume discount applies to Interstate IntraLATA monthly usage revenues aggregated from all of a business customer's billing telephone numbers (BTNs) that subscribe to Corporate Rewards.
2. There are minimum and maximum usage revenue thresholds within which a customer's usage revenue must be in order to qualify for a volume discount. Thresholds are designated as revenue tiers, as set forth in Section (v) following.
3. A customer's revenue tier is determined by rating its Interstate IntraLATA usage at the Toll Base Rate shown in Section (v) following.
4. The volume discount is automatically adjusted should a customer's usage revenue vary between revenue tiers.

(ii) Loyalty Discount

1. A loyalty discount commences in the 13th month a customer is enrolled in Corporate Rewards and increases each consecutive year the customer stays on the plan, up to and including the 5th year. The loyalty discount will apply to the customer's discounted monthly Interstate IntraLATA usage revenues and will be applied at the BTN level.
2. The loyalty discount will not apply to customers whose usage revenues exceed the Tier 4 maximum monthly aggregated usage revenue threshold.
